

Spooky Glow Stick Eyes

By Brian Enigma (brian@netninja.com), <http://nja.me/eyes>

1. Print this pattern on regular paper or, if available, cardstock.
2. Cut out the pattern. You can vary the eye design as much as you'd like.
3. Use the pattern to cut out black construction paper (either directly or by first tracing).
4. Fold as directed, forming a square tube.
5. Activate a glow stick and put it in the tube (you may have to cut off part of the glow stick's hanger to get it to fit).
6. Fold the end flaps closed. You may want to tape up the seams for sturdiness.
7. Hide it in a dark but visible place, such as dense bushes or a dimly lit bookshelf.
